

following guidelines are provided to assist in the preparation of comments.

### General Issues

A. Are the proposed collections of information necessary for the proper performance of the functions of the agency? Does the information have practical utility? (Practical utility is defined as the actual usefulness of information to or for an agency, taking into account its accuracy, adequacy, reliability, timeliness, and the agency's ability to process the information it collects.)

B. What enhancements can be made to the quality, utility, and clarity of the information to be collected?

As a potential respondent:

A. Are the instructions and definitions clear and sufficient? If not, which instructions need clarification?

B. Can information be submitted by the due date?

C. The estimated burden on each respondent on Form NHPA-830G and Annex A is an average of 1 hour per response (with one response per quarter, four times per year.) Burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose and provide the information, above what would be required for efficient management. Please comment on the accuracy of the estimate.

D. The agency estimates that the only costs to the respondents are for the time it will take them to complete the collection. Please comment if respondents will incur start-up costs for reporting, or any recurring annual costs for operation, maintenance, and purchase of services associated with this information collection.

E. What additional actions could be taken to minimize the burden of this collection of information? Such actions may involve the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

F. Does any other Federal, State, or local agency collect similar information? If so, specify the agency, the data element(s), and the methods of collection.
